PROFESSIONAL SUMMARY

Software Engineer with 1 year 8 months of full-stack development experience at Tata Consultancy Services, specializing in Java and Spring Boot backend development alongside cross-platform web and mobile applications. Built production applications including a hall-booking platform with automated layout generation and an optimization tool using Integer Linear Programming. Experienced in leading and mentoring teams and delivering technical Java training. Seeking a Spring Boot Backend Developer role to apply strong backend engineering, REST API development, and problem-solving skills.

TECHNICAL SKILLS

Languages: Java, Swift, JavaScript

Backend: Spring Boot, Spring AI, Microservices, REST APIs

Frontend & Mobile: React Native, React.js, iOS (ARKit, RealityKit)

DevOps & Tools: CI/CD, Jenkins, Git, IntelliJ IDEA

Concepts: Integer Linear Programming (ILP), Optimization, Data Structures & Algorithms

Practices: Agile Methodologies, SDLC, Team Leadership, Technical Training

PROFESSIONAL EXPERIENCE

Tata Consultancy Services — Chennai, India

Assistant Systems Engineer

Jan 2026 – Present

On-site

- Designed and developed a hall-booking application for both web and mobile using React.js and React Native, featuring automated hall design and layout generation.
- Integrated REST APIs with Spring Boot backend services to support booking, availability, and layout workflows.
- Led and mentored a team of 24, coordinating task allocation, code reviews, and on-time delivery within an Agile model.
- Delivered technical training sessions on Java, taking participants from basics to advanced topics.

Assistant System Engineer Trainee

Jul 2025 – Jan 2026

iOS Developer (ARKit & RealityKit)

- Built iOS applications leveraging ARKit and RealityKit to deliver augmented-reality experiences in Swift.
- Developed and consumed backend services using Java and Spring Boot to support application features.
- Collaborated with cross-functional teams to translate requirements into tested, working functionality.

Graduate Trainee

Jan 2025 – Jul 2025

On-site

- Completed hands-on training in Java development, Spring Boot, and Agile methodologies.
- Contributed to Java-based application modules and gained exposure to microservices and CI/CD practices.
- Applied core software engineering principles including version control with Git and collaborative development.

KEY PROJECTS

- Hall Booking Application (Web & Mobile)** — Developed a full-stack booking platform with automated hall design and layout generation, built with React.js, React Native, and a Spring Boot backend exposing REST APIs.
- Optimization Engine using Integer Linear Programming (ILP)** — Built an application that models and solves resource-allocation problems using ILP to produce optimal, constraint-satisfying solutions.

EDUCATION

B.Sc. in Computer Science

2024

Government General Degree College, Singur, West Bengal
